

QT round bar

42CrMo4 / SAE 4140 - bars and machined blanks

JOTAIN supplies 42CrMo4 and SAE 4140 round bars in quenched and tempered condition, with cutting, peeling and machining within the agreed supply. State the bar or blank as it will be delivered, including machining allowance. The grade, dimensions, properties and surface condition are agreed together.

01 Your enquiry

Fill in the information available. Mark open items "to be agreed".

Company / contact

Required grade and product standard / edition

Bar or machined blank; drawing / revision if applicable

Delivered diameter x length, units and quantity

QT and surface condition (black / peeled / machined)

Destination and requested delivery date

Complete page 2 for inspection requirements.

Save a copy after filling. Use additional sheets for longer details.

QT round bar

Inspection and order requirements

02 Add the requirements you already have

Dimensions, tolerances, straightness and machining allowance

Required properties, test methods and sampling conditions

Inspection documents, traceability and any UT requirements

Packing, marking or purchaser inspection requirements

Attachments and unresolved items

Provide the information available. Mark open requirements "to be agreed". Identify the controlling standard before proposing alternative grades. JOTAIN's quotation should state the offered specification, documents, schedule and any deviations for purchaser review.

This blank checklist records enquiry requirements. It is not a test certificate, an accepted specification or confirmation of availability.
